Cytochrome c_6 from *Monoraphidium braunii* – A cytochrome with an unusual heme axial coordination
António P. Campos, António P. Aguiar, Manuel Hervás, Manuela Regalla, José A. Navarro, José M. Ortega, António V. Xavier, Miguel A. De La Rosa, Miguel Teixeira 329–341

Proteins of the Golgi apparatus – Purification to homogeneity, N-terminal sequence, and unusually large Stokes radius of the membrane-bound form of UDP-galactose:*N*-acetylglucosamine β1-4galactosyltransferase from rat liver
Brad Bendiak, Larry D. Ward, Richard J. Simpson 405–417

Solution structures of the lantibiotics duramycin B and C
Norbert Zimmermann, Stefan Freund, Andreas Fredenhagen, Günther Jung 419–428

A novel 77-residue peptide from porcine brain contains a leucine-zipper motif and is recognized by an antiserum to delta-sleep-inducing peptide
Rannar Sillard, Peter Schulz-Knappe, Petra Vogel, Manfred Raida, Klaus W. Bensch, Wolf-Georg Forssmann, Viktor Mutt 429–436

Role of the B1 short arm in laminin self-assembly
Johannes Constantin Schittny, Christiane Martha Schittny 437–441

Exploration of the single-stranded DNA-binding domains of the gene V proteins encoded by the filamentous bacteriophages IKe and M13 by means of spin-labeled oligonucleotide and lanthanide-chelate complexes
John P. M. van Duynhoven, Irene M. A. Nooren, Dorine W. Swinkels, Paul J. M. Folkers, Ben J. M. Harmsen, Ruud N. H. Konings, Godefridus I. Tesser, Cornelis W. Hilbers 507–517

Molecular assembly of plasminogen and tissue-type plasminogen activator on an evolving fibrin surface
Valérie Fleury, Stéphane Loyau, H. Roger Lijnen, Willem Nieuwenhuizen, Eduardo Anglés-Cano 549–556

Isolation of three antibacterial peptides from pig intestine: gastric inhibitory polypeptide(7–42), diazepam-binding inhibitor(32–86) and a novel factor, peptide 3910
Birgitta Agerberth, Anita Boman, Mats Andersson, Hans Jörnvall, Viktor Mutt, Hans G. Boman 623–629

Purification and characterization of new anti-adrenocorticotropin rabbit neutrophil peptides (defensins)
Naoyuki Fuse, Yoshio Hayashi, Junichi Fukata, Tomoko Tominaga, Osamu Ebisui, Yoshimi Satoh, Toshio Isohara, Isao Uno, Hiroo Imura 653–659

Photoaffinity labeling of *Torpedo* acetylcholine receptor by physostigmine
Andre Schrattenholz, Jasminka Godovac-Zimmermann, Hans-Jochen Schäfer, Edson X. Albuquerque, Alfred Maelicke 671–677

The L-lactate dehydrogenase gene of the hyperthermophilic bacterium *Thermotoga maritima* cloned by complementation in *Escherichia coli*
Ralf Ostendorp, Wolfgang Liebl, Hartmut Schurig, Rainer Jaenicke 709–715

Rabbit procathepsin E and cathepsin E – Nucleotide sequence of cDNA, hydrolytic specificity for biologically active peptides and gene expression during development
Takashi Kageyama 717–728

Purification and primary structure of snail metallothionein – Similarity of the N-terminal sequence with histones H4 and H2A
Reinhard Dallinger, Burkhard Berger, Peter E. Hunziker, Neil Birchler, Charles R. Hauer, Jeremias H. R. Kägi 739–746

A study of colchicine tubulin complex by donor quenching of fluorescence energy transfer
Anusree Bhattacharyya, Bhabatarak Bhattacharyya, Siddhartha Roy 757–761

Variation of the glycosylation of human pancreatic bile-salt-dependent lipase
Eric Mas, Nezha Abouakil, Samira Roudani, Jean-Louis Franc, Jean Montreuil, Dominique Lombardo 807–812

Determinants for the enhanced thermostability of hybrid (1-3,1-4)-β-glucanases
Oliver Politz, Ortwin Simon, Ole Olsen, Rainer Borriss 829–834

The amino acid sequence of *Ole e* I, the major allergen from olive tree (*Olea europaea*) pollen
Mayte Villalba, Eva Batanero, Carlos López-Otín, Luis M. Sánchez, Rafael I. Monsalve, Manuel A. González de la Peña, Carlos Lahoz, Rosalía Rodríguez 863–869

Enzymology

An arrestin homolog of blowfly photoreceptors stimulates visual-pigment phosphorylation by activating a membrane-associated protein kinase
Joachim Bentrop, Anette Plangger, Reinhard Paulsen 67–73

Purification and preliminary characterization of the extracellular lipase of *Bacillus subtilis* 168, an extremely basic pH-tolerant enzyme
Emmanuel Lesuisse, Karin Schanck, Charles Colson 155–160

Complex of ribonuclease Sa with a cyclic nucleotide and a proposed model for the reaction intermediate
Jozef Sevcik, Ingrid Zegers, Lode Wyns, Zbigniew Dauter, Keith S. Wilson 301–305

Mechanisms of activation of mammalian plasma fibrinolytic systems with streptokinase and with recombinant staphylokinase
Désiré Collen, Bertha Van Hoef, Bernhard Schlott, Manfred Hartmann, Karl-Heinz Gührs, H. Roger Lijnen 307–314

Purification and characterization of an NADH–rubredoxin oxidoreductase involved in the utilization of oxygen by *Desulfovibrio gigas*
Liang Chen, Ming-Yih Liu, Jean Legall, Paula Fareleira, Helena Santos, António V. Xavier 443–448

Acylation of porcine pancreatic phospholipase A_2 influences penetration and substrate head-group binding, depending on the position of the acylated lysine in the enzyme molecule
Richard B. Lugtigheid, Gerrie A. F. Nicolaes, Edwin J. A. Veldhuizen, Arend J. Slotboom, Hubertus M. Verheij, Gerard H. de Haas 519–525

Structure and metabolic control of the *Yarrowia lipolytica* peroxisomal 3-oxoacyl-CoA-thiolase gene
Gabriele Berninger, Robert Schmidtchen, Gaby Casel, Annegret Knörr, Karin Rautenstrauss, Wolf-Hubert Kunau, Eckhart Schweizer 607–613

Bovine lens acylpeptide hydrolase – Purification and characterization of a tetrameric enzyme resistant to urea denaturation and proteolytic inactivation
K. Krishna Sharma, Beryl J. Ortwerth 631–637

Probes of ligand-induced conformational change in aspartate aminotransferase
Annelise Garnier, Robert A. John 763–768

Purification of trehalose synthase from baker's yeast – Its temperature-dependent activation by fructose 6-phosphate and inhibition by phosphate
John Londesborough, Outi E. Vuorio, M. Sánchez, Rafael I. Monsalve, Manuel A. González de la Peña, Carlos Lahoz, Rosalía Rodríguez 841–848

Carbohydrates, lipids and other natural products

Comparative study of high-mannose-type oligosaccharides in membrane glycoproteins of rat hepatocytes and different rat hepatoma cell lines
Rolf Nuck, Christine Paul, Barbara Wieland, Claudia Heidrich, Christoph C. Geilen, Werner Reutter 215–221

Identification of digitalis-like compounds in human cataractous lenses
David Lichtstein, Irith Gati, Sarah Samuelov, David Berson, Yaacov Rozenman, Louis Landau, Joseph Deutsch 261–268

Molecular cloning and expression of Galβ1,3GalNAcα2,3-sialyltransferase from mouse brain
Young-Choon Lee, Nobuyuki Kurosawa, Toshiro Hamamoto, Takashi Nakaoka, Shuichi Tsuji 377–385

Cholesterol trafficking in steroidogenic cells – Reversible cycloheximide-dependent accumulation of cholesterol in a presteroidogenic pool
Victoria L. Stevens, Tingsen Xu, J. David Lambeth 557–563

The use of human milk fucosyltransferase in the synthesis of tumor-associated trimeric X determinants
Theodora De Vries, Thomas Norberg, Hans Lönn, Dirk H. Van Den Eijnden 769–777

Studies on *O*-glycans of *Plasmodium-falciparum*-infected human erythrocytes – Evidence for *O*-GlcNAc and *O*-GlcNAc-transferase in malaria parasites
Angela Dieckmann-Schuppert, Ernst Bause, Ralph T. Schwarz 779–788

Selective inhibition of *N*-acetylglucosamine and galactose-specific lectins including the 14-kDa vertebrate lectin by novel synthetic biantennary oligosaccharides
Dipti Gupta, Subramaniam Sabesan, C. Fred Brewer 789–797

The structure of N-linked oligosaccharides of human pancreatic bile-salt-dependent lipase
Tsukasa Sugo, Eric Mas, Nezha Abouakil, Tamao Endo, Maria-Juana Escribano, Akira Kobata, Dominique Lombardo 799–805

Membranes and bioenergetics

Non-cytochrome mediated mitochondrial ATP production in bloodstream form *Trypanosoma brucei brucei*
E. Jay Bienen, Raj. K. Maturi, Georgios Pollakis, Allen B. Clarkson Jr 75–80

Large-scale preparation of fully deuterated cell components – Ribosomes from *Escherichia coli* with high biological activity
Kalju Vanatalu, Toomas Paalme, Raivo Vilu, Nils Burkhardt, Ralf Jünemann, Roland May, Martin Rühl, Jörg Wadzack, Knud H. Nierhaus 315–321

The electrochemical-proton-gradient-activated states of F_0F_1 ATPase in plant mitochondria as revealed by detergents
Marie Valerio, Philippe Diolez, Francis Haraux 565–571

A novel primary Ca^{2+}-transport system from *Saccharomyces cerevisiae*
Lev A. Okorokov, Widmar Tanner, Ludwig Lehle 573–577

Molecular cell biology and metabolism

Activation of the cloned platelet thrombin receptor decreases the pertussis-toxin-dependent ADP-ribosylation of the membrane and soluble inhibitory guanine-nucleotide-binding-α proteins – Inhibition by the prostacyclin analog, iloprost
Bernhard Wilhelm, Wolfgang Siess 81–88

Intestinal arginine metabolism during development – Evidence for *de novo* synthesis of L-arginine in newborn pig enterocytes
François Blachier, Hamida M'Rabet-Touil, Leta Posho, Béatrice Darcy-Vrillon, Pierre-Henri Duée 109–117

The major-histocompatibility-complex-encoded β-type proteasome subunits LMP2 and LMP7 – Evidence that LMP2 and LMP7 are synthesized as proproteins and that cellular levels of both mRNA and LMP-containing 20S proteasomes are differentially regulated
Stefan Frentzel, Inge Kuhn-Hartmann, Martina Gernold, Peter Gött, Angela Seelig, Peter-M. Kloetzel 119–126

Evidence for transformation-related increase in CTP synthetase activity *in situ* in human lymphoblastic leukemia
A. André van den Berg, Henk van Lenthe, Sandra Busch, Dirk de Korte, Dirk Roos, André B. P. van Kuilenburg, Albert H. van Gennip 161–167

Secretory phospholipase A_2 is not required for arachidonic acid liberation during platelet activation
Carine Mounier, Ahmad Faili, B. Boris Vargaftig, Cassian Bon, Mohamed Hatmi 169–175

The role of the proton-pumping and alternative respiratory chain NADH:ubiquinone oxidoreductases in overflow catabolism of *Aspergillus niger*
Claudia Prömper, Regina Schneider, Hanns Weiss 223–230

ADP-stimulated fibrinogen binding is necessary for some of the inositol phospholipid changes found in ADP-stimulated platelets
John D. Vickers 231–237

Both isoforms of protein phosphatase Z are essential for the maintenance of cell size and integrity in *Saccharomyces cerevisiae* in response to osmotic stress
Valerie Hughes, Anneliese Müller, Michael J. R. Stark, Patricia T. W. Cohen 269–279

Isolation and identification of two proto-oncogene products related to c-*fgr* and *fyn* in a tyrosine-protein-kinase fraction of rat spleen
Anna Maria Brunati, Peter James, Arianna Donella-Deana, Brona Matoskova, Keith C. Robbins, Lorenzo A. Pinna 323–327

A universal method for achieving increases in metabolite production
Henrik Kacser, Luis Acerenza 361–367

In vivo regulation of low-density lipoprotein receptors by estrogen differs at the post-transcriptional level in rat and mouse
Rai Ajit K. Srivastava, Dirk Baumann, Gustav Schonfeld 527–538

A glutathione *S*-transferase with glutathione-peroxidase activity from *Arabidopsis thaliana* – Molecular cloning and functional characterization
Dieter Bartling, Renate Radzio, Ulrike Steiner, Elmar W. Weiler 579–586

A lipid-anchored heparan sulfate proteoglycan is present in the surface of differentiated skeletal muscle cells – Isolation and biochemical characterization
Alejandro Campos, Rebeca Núñez, Cecilia S. Koenig, David J. Carey, Enrique Brandan 587–595

Activation and substrate specificity of the human protein kinase C α and ζ isoenzymes
Georg Kochs, Richard Hummel, Diana Meyer, Hubert Hug, Dieter Marmé, Thomas F. Sarre 597–606

Acyl-CoA synthetase mRNA expression is controlled by fibric-acid derivatives, feeding and liver proliferation
Kristina Schoonjans, Bart Staels, Paul Grimaldi, Johan Auwerx 615–622

Tyrosine-kinase activity in rabbit platelets stimulated with platelet-activating factor – The effect of inhibiting tyrosine kinase with genistein on platelet-signal- molecule elevation and functional responses
Christine T. Murphy, Stuart Kellie, John Westwick 639–651

Complete sequence of human fast-type and slow-type muscle myosin-binding-protein C (MyBP–C) – Differential expression, conserved domain structure and chromosome assignment
Franz E. Weber, Kevin T. Vaughan, Fernando C. Reinach, Donald A. Fischman 661–669

Molecular cloning and functional expression of different molecular forms of rat amiloride-binding proteins
Eric Lingueglia, Stéphane Renard, Nicolas Voilley, Rainer Waldmann, Olivier Chassande, Michel Lazdunski, Pascal Barbry 679–687

Does oligosaccharide-phosphatidylinositol (glycosyl-phosphatidylinositol) hydrolysis mediate prolactin signal transduction in granulosa cells?
Luisa F. Fanjul, Isabel Marrero, Juan González, José Quintana, Pino Santana, Francisco Estévez, Jose María Mato, Carlos M. Ruiz de Galarreta 747–755

GTPase activity of small GTP-binding proteins in HL-60 membranes is stimulated by arachidonic acid
Erzsébet Ligeti, Veronique Pizon, Alfred Wittinghofer, Peter Gierschik, Karl H. Jakobs 813–820

Erythropoietin induces the association of phosphatidylinositol 3'-kinase with a tyrosine-phosphorylated protein complex containing the erythropoietin receptor
Patrick Mayeux, Isabelle Dusanter-Fourt, Odile Muller, Philippe Mauduit, Michèle Sabbah, Brian Druker, William Vainchenker, Sigmund Fischer, Catherine Lacombe, Sylvie Gisselbrecht 821–828

Biosynthesis of platelet-activating factor in cultured mast cells – Involvement of the CoA-independent transacylase demonstrated by analysis of the molecular species of platelet-activating factor
Odile Colard, Jocelyne Bidault, Michelyne Breton, Ewa Ninio 835–840

Application of an ectopic expression system for the selection of protein-isoform-specific antibodies – The monoclonal antibody K1C3 is specific for the RCK1 potassium channel
Sigrid Reinhardt-Maelicke, Sabine Kurz, Sabine Sewing, Martin Stocker, Olaf Pongs 871–877
